

FOR DATA SECURITY & COMPLIANCE

CORRELOG SOFTWARE SOLUTIONS PROVIDE UP-TO-THE-SECOND NOTIFICATIONS AND ALERTS CONCERNING ALL YOUR DATA SECURITY INITIATIVES, WITH COMPLIANCE SCORECARDS FOR NEARLY ALL COMPLIANCE LAWS AND STANDARDS.

IT Security Compliance is a crucial element of every successful IT organization. Commercial, Federal and State penalties for non-compliance continue to be less-forgiving. Add to the mix the monetary liability that the GDPR brings and the damage to your brand and your bottom line could be staggering. It is clear you need to act now to ensure your data security meets today's laws and standards.

The CorreLog solutions for data security are designed to play a major role in monitoring all data access to determine in real time, the health of your compliance initiatives. Our products support a myriad of standards that have been formulated for the protection of your and your customers' employees. The compliance summaries below provide an overview of specific features that allow you to navigate diverse federal and industry standards, guidelines, and regulations.

CORRELOG.COM

CORRELOG FOR THE GDPR

General Data Protection Regulation (GDPR) affects any person or organization that comes in contact with “data subjects” who are European Union citizens no matter where they reside. And because it’s so new its impact will largely be unknown until the EU starts levying fines abroad and non-EU entities respond to the penalties. You must still provide best-practice data security compliance to all data stores. This is not your ordinary standard, it is a law designed to protect the personal identity of EU citizens, aged 16 and older. Our compliance experts at CorreLog have written a whitepaper, an executive summary, and a data sheet on everything you need to know about GDPR. To download these documents, visit CorreLog.com/gdpr.

CORRELOG FOR FISMA COMPLIANCE

The Federal Information Security Management Act (FISMA) provides standards and guidelines that govern the processing of information for any U.S. federal system. This standard is required if you are working with Federal records and is also recommended for private industry as a foundation for all information security policies. CorreLog offers many FISMA compliance support documents. For WIN/UNIX compliance visit CorreLog.com/fisma to download our WIN/UNIX FISMA datasheet and z/OS FISMA compliance whitepaper, datasheet, and quick guide to FISMA compliance.

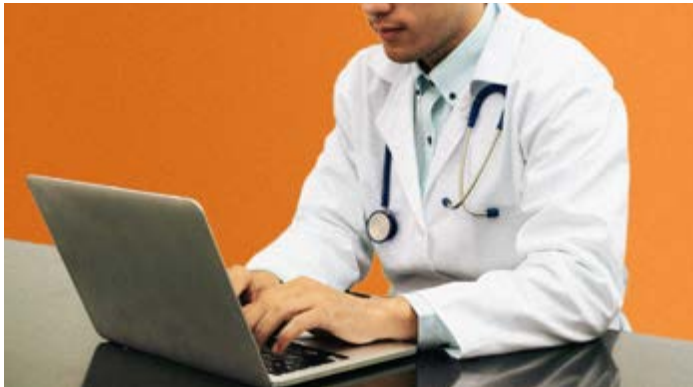

CORRELOG FOR PCI DSS COMPLIANCE

The Payment Card Industry Data Security Standard (PCI DSS) governs all companies and organizations that accept or process credit cards. You need to support this critical and worldwide standard if you are involved in any sales transaction, either directly or peripherally, which touches your customer’s credit card information. Ninety percent of the world’s credit-card transactions pass through a mainframe so it affects virtually every merchant that processes credit cards. For more information on PCI DSS you can visit CorreLog.com/pcidss and download the PCI DSS Checklist

CORRELOG FOR SARBANES-OXLEY COMPLIANCE

The Sarbanes-Oxley Act (SOX) is Federal law for all publicly held U.S. corporations, and establishes extensive civil and criminal penalties for non-compliance. This law contains multiple provisions for tracking users, data access, and providing data security for audit and forensic purposes. For more information about SOX compliance check out our Sarbanes-Oxley Compliance Checklist at CorreLog.com/sox.

CORRELOG FOR HIPAA COMPLIANCE

The U.S. Federal Health Insurance Portability and Accountability Act (HIPAA) contains elaborate and essential security policies that are required for any organization that touches the private health record information of U.S. citizens and residence. This standard is required of all hospitals, doctors, health care workers, and health insurance companies. To learn more about HIPAA compliance visit CorreLog.com/hipaa to download our HIPAA datasheet.

CORRELOG FOR GLBA COMPLIANCE

GLBA, the Gramm-Leach-Bliley Act, establishes strict compliance standards for protecting customer data and customer privacy at financial institutions.

This US Federal law mandates that financial institutions place IT controls upon computer systems and applications that contain customer data. If you are a bank, brokerage firm, insurance company, or other financial institution, and you have no verifiable IT controls over your customer data, you are NOT compliant with GLBA. To learn more about GLBA compliance you can download the CorreLog for GLBA datasheet at CorreLog.com/glba.

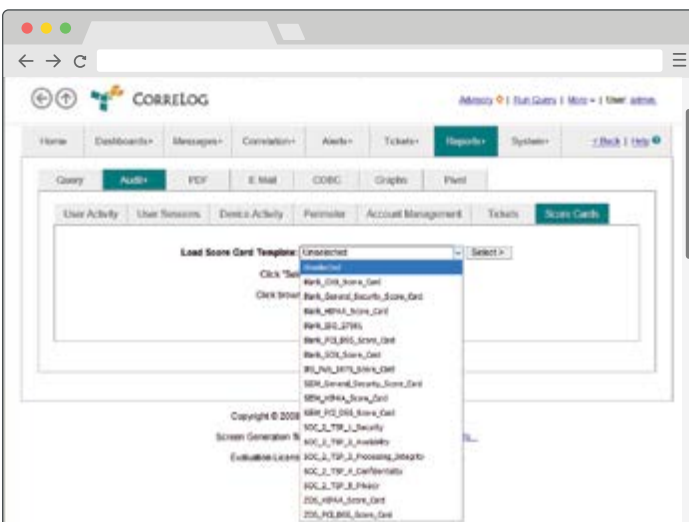

CORRELOG FOR IRS PUB. 1075 COMPLIANCE

The IRS Publication 1075 requires security and privacy controls for the confidentiality of Federal Tax Information (FTI) data in all stages from storage, usage, access, transfer, and disposal. The publication verifies compliance requirements through the identification and mitigation of any risk of loss, breach, or misuse of FTI. Visit CorreLog.com/irs1075 to download our IRS PUB. 1075 datasheet.

CORRELOG FOR ISO 27001 COMPLIANCE

ISO 27001 provides worldwide standards and guidelines for establishing control to information security management systems in all organizations. Organizations that meet the requirements may be certified by an accredited certification body following successful completion of an audit. . ISO 27001 requires that organizations have systems in place that determine the information security risks of the organization, implement an information security control for those risks, and adopt a management process to ensure that the information security controls continue to the meet the organizations' information security needs. For more information about ISO 27001 visit CorreLog.com/iso27001.

COMPLIANCE SCORECARDS OUT OF BOX

CorreLog offers out-of-the-box compliance scorecards for each of these security compliance standards. Easy and fast configuration allows you to see your security and compliance score shortly after installation. At any time of your workday, there is a CorreLog dashboard with a scorecard to help gauge the status of your data security, leading to a higher degree of maintaining compliance. Visit CorreLog.com to request a free trial download of any of our software products and build on your current security compliance initiatives.
